

## How to add NEW students to a class

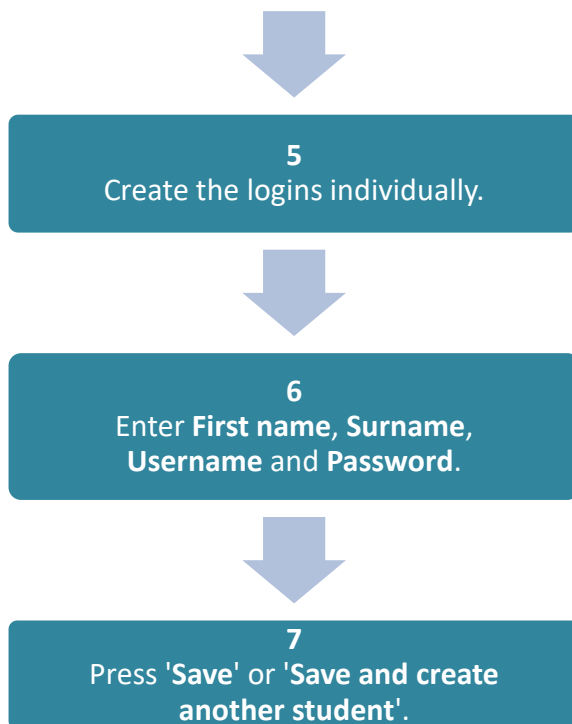

For students who **DO NOT** have a Spellzone login\*

**Do not create multiple logins for the same student.**

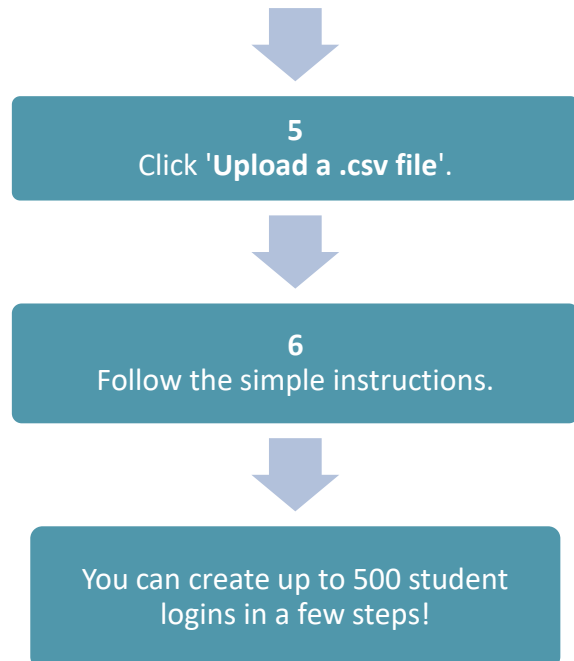

\* not available if your school account is synced with Wonde

For a small number of students

For multiple students

**Note:**

'Classes' can be used to organise students for example into year groups or subject classes. Students can be added to multiple classes. Multiple classes can be uploaded via a .csv file. Removing a student from a class does not delete them from the Spellzone.
