

How to create student logins

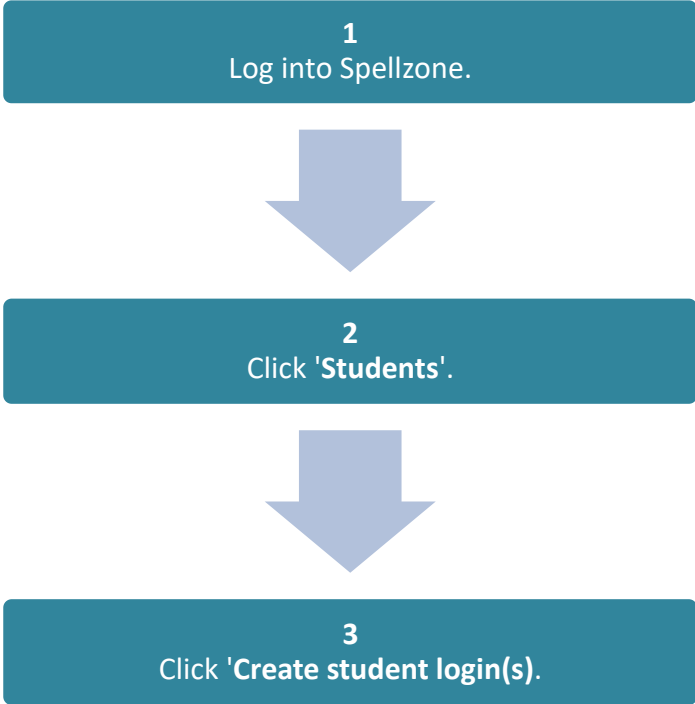

For students who do not already have a Spellzone login.

Do not create multiple logins for the same student.

* not available if your school account is synced with Wonde

1
Log into Spellzone.

2
Click 'Students'.

3
Click 'Create student login(s)'.

For a small number of students

5
Create the logins individually.

6
Enter **First name, Surname, Username and Password.**

7
Press 'Save' or 'Save and create another student'.

For multiple students

5
Click 'Upload a .csv file'.

6
Follow the simple instructions.

You can create up to 500 student logins in a few steps!

Note:

'Classes' can be used to organise students for example into year groups or subject classes. Students can be added to multiple classes. Multiple classes can be uploaded via a .csv file. Removing a student from a class does not delete them from the Spellzone.
