

## Spelling list: *ph* words - set 2

The /f/ sound is usually spelt with an *f* , or, if after a short vowel sound, the letters *ff* .

However, have you ever noticed that some words, like *phone* and *alphabet* , are pronounced with an *f* sound but are spelt with the letter combination *ph* ?

This unusual spelling can be traced back to origins in Ancient Greek, where the letter *phi* ( $\phi$ ) represented the *f* sound. Over time, this Ancient Greek influence found its way into the English language, giving us the *ph* spelling pattern.

As you become a more confident speller, you will begin to notice that this spelling pattern often appears in words which share the same Ancient Greek root, for example: *photograph* , *photocopy* , and *photosynthesis* all contain the root *photo* which is spelt using the letters *ph* .
