Spelling list: Exploring Science 7G

chemistry - solids, liquids and gases

properties Properties are what a material or substance is like and how it behaves.

flow The particles in a liquid can **flow** easily from one container to another.

volume The **volume** of an object is the amount of space that it takes up.

dense Any object that is heavy for its volume is **dense**, for example solids.

solids Solids have a fixed shape and volume.

liquids Liquids have a fixed volume but no fixed shape.

gases Gases do not have a fixed shape or volume and are easy to squash.

particles Everything is made out of tiny pieces called **particles** .

Diffusion is when particles spread and mix with each other without anything

moving them.

dissolve To **dissolve** is to mix a solid with a liquid so it becomes a liquid too.

diffusion
